

CLAIMS

I claim:

1. An apparatus for applying supplemental hair to the scalp of the wearer comprising:
two grip handles, two clamp arms, and a clamp operable to open and close said apparatus to release supplemental hair.
2. The apparatus of claim 1 wherein: each said grip handle comprises a non-slip surface.
3. The apparatus of claim 1 wherein: each grip handle is utilized to hold and manipulate said apparatus into position.
4. The apparatus of claim 1 wherein: said clamp arms are mechanically attached.
5. The apparatus of claim 1 wherein: said clamp arms securely contain supplemental hair between them.
6. The apparatus of claim 1 wherein: supplemental hair strands are positioned flat, not overlapping, but are parallel to each other on clamp arm one of claim 5.
7. The apparatus of claim 1 wherein: supplemental hair strands are held in place with clamp arm two of claim 5.
8. The apparatus of claim 1 wherein: said clamp arms are flexible to conform to the contour of the partings on the scalp of the wearer.
9. The apparatus of claim 1 wherein: said clamp comprises a rivet, which is the pivotable component of claim 4, allowing the ability to open and close.
10. The apparatus of claim 1 wherein: said clamp comprises a spring encompassing claim 9 enabling and supporting claim 9.
11. The apparatus of claim 1 wherein: the amount of supplemental hair strands are contingent upon the size of the said apparatus.
12. The apparatus of claim 1 wherein: the plurality of supplemental hair strands have a first end and a second end.
13. The apparatus of claim 1 wherein: the first end of the plurality of supplemental hair strands are creased over the free edge of claim 6.
14. The apparatus of claim 1 wherein: the supplemental hair strands of claim 13 are creased

180 degrees.

15. A method of hair extension comprising the steps of:
 - a. determining the final hairstyle
 - b. parting natural hair to compliment final hairstyle
 - b (1). partings of natural hair coincide with natural hair density thereby enhancing length added
 - c. exposing the scalp of the wearer
 - d. applying adhesive on exposed scalp
 - d (1). application of adhesive should coincide with the size of said apparatus in claim 1
 - e. placing the supplemental hair of claim 13 on the applied adhesive
 - f. allowing adhesive to dry
 - f (1). or speeding the drying time with a low speed airflow hand held blow dryer
 - g. opening apparatus of claim 1 to release supplemental hair by pinching the clamp of claim 9 with the thumb and forefinger.
16. The method of claim 15, further comprising the step of shampooing the wearer's natural hair prior to determining final hairstyle.
17. The method of claim 15, further comprising the step of thoroughly drying natural hair into position of desired final hairstyle prior to 15b.
18. A method of thickening a wearer's natural hair with supplemental hair comprising the steps of :
 - a. determining the final hairstyle
 - b. parting natural hair to compliment final hairstyle
 - b (1). parting natural hair to enhance natural hair density, thereby adding thickness to the wearer's natural hair
 - b (2). increasing the number of partings increases the amount of supplemental hair added to the wearer's natural hair
 - c. exposing the scalp of the wearer
 - d. applying adhesive on exposed scalp
 - d (1). application of adhesive should coincide with the size of said apparatus in claim 1
 - e. placing the supplemental hair of claim 13 on the applied adhesive

- f. allowing adhesive to dry
 - f (1). or speeding the drying time with low speed airflow from a hand held blow dryer
- g. opening apparatus of claim 1 to release supplemental hair by pinching the clamp of claim 9 with the thumb and forefinger.
- 19. The method of claim 18, further comprising the step of shampooing the wearer's natural hair prior to determining final hairstyle.
- 20. The method of claim 18, further comprising the step of thoroughly drying natural hair into position of desired final hairstyle prior to 18b.
- 21. A method of concealing hair loss with supplemental hair comprising steps of :
 - a. determining the final hairstyle
 - b. sectioning wearer's natural hair into zones comprising no hairloss zone and hairloss zone
 - c. parting natural hair in no hairloss zone so that supplemental hair applied will coincide with the wearer's natural hair density
 - d. exposing the scalp of the wearer
 - e. applying adhesive on exposed scalp
 - e (1). application of adhesive should coincide with the size of said apparatus in claim 1
 - f. placing the supplemental hair of claim 13 on the applied adhesive
 - g. allowing adhesive to dry
 - g (1). or speeding the drying time with low speed airflow from a hand held blow dryer
 - h. opening apparatus of claim 1 to release supplemental hair by pinching the clamp of claim 9 with the thumb and forefinger.
 - i. parting natural hair in hairloss zone to enhance natural hair density thereby adding thickness to the wearer's natural hair
 - i (1). increasing the number of partings increases the amount of supplemental hair added to the wearer's natural hair
 - j. exposing the scalp of the wearer
 - k. applying adhesive on exposed scalp
 - k (1). application of adhesive should coincide with the size of said apparatus in claim 1

- l. placing the supplemental hair of claim 13 on the applied adhesive
 - m. allowing adhesive to dry
 - m (1). or speeding the drying time with a low airflow from a hand held blow dryer
 - n. opening apparatus of claim 1 to release supplemental hair by pinching the clamp of claim 9 with the thumb and forefinger
22. The method of claim 21, further comprising the step of shampooing the wearer's natural hair prior to determine final hairstyle.
23. The method of claim 21, further comprising the step of thoroughly drying the wearer's natural hair into position of desired final hairstyle prior to 21b.
24. The method of claim 21, further comprising the step of balancing entire supplemental hair application so that hair density is even throughout wearer's head.
